

Localising support for Council Tax – HELP IS AT HAND

The Government wants there to be local power to run a scheme to replace the current Council Tax Benefit system. However, overall expenditure in this area will be cut by 10%.

Many local authorities are welcoming the transfer of power to a local level. But having greater control over fewer resources puts councils in a very difficult position. Getting your predictions badly wrong is not an option.

To manage risk, local councils need quick access to accurate data about their citizens, and need to model the precise impact of changes.

EVOLVE is a state-of-the-art tool to help you do this.

EVOLVE is a collaboration between the IRRV and Destin Solutions Limited and allows you to:

- understand in detail the make up of your current claimant profile, from information stored in a range of different systems
- model various scenarios going forwards
- design a viable and fair scheme for your area
- change the basis of your scheme annually
- prepare clear information for consultation purposes
