

ASPIRE

Bespoke workflow to support **your** routine processes

Our unique combination of sector-specific knowledge, and skills in the development of applications, allow us to offer you really low-cost solutions to your day-to-day processing problems.

Destin Solutions' **ASPIRE** can be used to:

- Track cases
- Prompt staff by delivering items to users as and when follow up action is required
- Route cases at key points in the process
- Produce documentation
- Allow data entry using bespoke forms
- Issue email alerts
- Provide links to external agencies to improve process flow and communication
- Use the sophisticated reporting solutions to provide detailed analysis of all stages in the process.

Your web-based application can be quickly developed and deployed, and requires no lengthy implementation.

Most importantly, the uses for ASPIRE are unlimited – just tell us which of your processes are causing you the most problems.
